

HARSHIT JOSHI

Full Stack Developer | MERN Stack | React.js | Node.js

Haldwani, Uttarakhand | 7017089462 | harshjoshi25022002@gmail.com
[linkedin.com/in/harshit-joshi-79600823b](https://www.linkedin.com/in/harshit-joshi-79600823b) | github.com/harshitjoshi387

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building scalable MERN stack applications. Proficient in RESTful API development, responsive UI design, and integrating AI/ML models into production-grade apps. Strong foundation in DSA, OOP, MVC Architecture, and modern DevOps tools including Docker and Kubernetes.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Redux, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Helmet.js, Multer

Database & DevOps: MongoDB, MySQL, Git, GitHub, Docker, Kubernetes, CI/CD, Postman

Other: Python, Java, C++, DSA, OOP, MVC Architecture, Agile, Web Security

PROJECTS

Moodify — Mood-Based Music Recommendation App

May 2026

Stack: MongoDB, Express.js, React.js, Node.js, MediaPipe AI

Live: <https://moodify-gb5i4pdcl-harshitjoshi387s-projects.vercel.app>

GitHub: github.com/harshitjoshi387

- Engineered a full-stack MERN application for real-time mood-based music recommendations, reducing manual song selection time by ~70%.
- Integrated MediaPipe AI for real-time facial expression & emotion recognition via webcam, accurately classifying 5+ emotional states.
- Architected 10+ RESTful APIs with Node.js & Express.js; implemented JWT auth and Helmet.js security headers, reducing API response time by 30%.
- Built fully responsive React.js UI with Redux state management, improving component performance by 25% across all devices.
- Deployed on Vercel with CI/CD pipeline, enabling automated builds and zero-downtime production deployments.

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – 2027

Amrapali University, Haldwani, Uttarakhand | CGPA: 7.0

Relevant Coursework: Data Structures & Algorithms, DBMS, Web Technologies, Computer Networks, OOP

ACHIEVEMENTS & ACTIVITIES

- Maintained 10+ active GitHub repositories showcasing full-stack, AI-integrated, and REST API-based projects.
- Self-learned Docker & Kubernetes for containerization and orchestration beyond academic curriculum.
- Applied web security best practices (CORS, input validation, secure HTTP headers) consistently across all projects.
